In Honduras, 2-year-old Jacky is hungry, her empty belly aching for food that her mother, doesn’t have to give her.

Malnourished, Jacky’s little body is too weak to fend off treatable illnesses like colds and fevers.

Her mother, Ester, wants desperately to end her baby’s pain. But without a job, she has no way to provide her precious daughter with the nourishment and medical attention she needs.

Your gifts to Food For The Poor will give precious little ones like Jacky access to food and medicine they need to help them thrive.
