and Nicaragua**

### The Need

In today's world, life for impoverished families living in a developing country is extremely difficult. Now, just like everyone else around the world, the indigent are having to cope with the monumental disaster of a global pandemic, yet they have absolutely no resources and no social programs for cushioning. Add to this harsh reality having to navigate the aftermath of powerful hurricanes, and life for the poor can seem totally and utterly hopeless. Food insecurity and malnutrition among the most vulnerable populations have worsened in these rural areas. The desperate need for food and essential nutrients impacts all ages in all sectors of these countries. Most eat only once per day and their basic diet consists mainly of rice, beans, and corn tortillas.

### How You Can Help

With your help, we will be able to increase the availability of nutrition and provide opportunities for income to impoverished families through establishment of animal husbandry projects. These projects will include the farming of different animals such as chickens, goats, pigs, and bees. Families will be able to earn an income by selling the by-products of the animals. They will also be able to use the animals for their own consumption, providing them with the nutrients they so desperately need. Please prayerfully consider coming alongside us to help alleviate food insecurity for so many families in need.
